Middle Level Education

Goal 1

Develop and implement strategies to address recruitment and retention.

Objective 1a: Meet with key stakeholders to target populations across the state in order to increase awareness of the program and conduct specific recruiting activities.

Objective 1b: Develop strategies and instruments that capture the retention, recruitment, and placement/success of students after graduation.

Rationale: Data indicates that the middle level program has a high retention and graduation rate. However, it is unclear as to how students are deciding to enter the middle school education program, the best strategies/practices that are being used to retain students, and the best method to track students and their success once they leave the program.

• IRB  
• Graduate Assistant | • Host Middle School Advisory Council meetings.  
• Develop and send survey post cards or emails to program completers.  
• Host pre-graduation/post program completion focus groups with preservice teachers.  
• Work with advising to develop instruments that can be used to track students | • Meeting minutes indicating ideas represented for recruitment, retention, and tracking of middle school preservice teachers and program completers.  
• Focus group transcripts indicating program completers’ perceptions of recruitment, retention, and tracking of middle level program completers.  
• Minutes from advising meetings that indicate | • Data that indicates the recruitment, retention, and tracking of middle level preservice and program completers.  
• Developed instruments used for the tracking of the recruitment, retention, and tracking of middle level preservice teachers. | • Data reporting that gives empirical evidence to support recruitment, retention, and tracking of middle level preservice teachers. |
| upon entrance and exit of the program. | instruments being gathered/created to track students’ recruitment, retention, and post-graduation activities. |  |  |
Goal 2

Develop and implement strategies to increase student awareness and proficiency in culturally responsiveness.

Objective 2a: Provide best practices for preservice teachers to become proficient in culturally responsiveness.

Objective 2b: Track and gather data that indicates the development of culturally responsiveness over the course of the middle program degree completion.

Rationale: In an effort to demonstrate proficiency in diversity for CAEP, the middle school program will engage students in culturally responsiveness through practicum placements, action research, and course work. Engaging students in culturally responsive practices will enable the middle level candidate to implement such practices in environments where biases have not been addressed or environments that serve diverse populations. Such proficiency will increase candidate viability for employment and improve recruitment of marginalized populations to the middle school program.
## COE-CIQAPP: OBJECTIVE BASED EVALUATION MODEL

Goal 3

Sustain and increase partnerships with various school districts.

Objective 3a: Increase the number of candidates enrolled in the yearlong internship program.

Objective 3b: Increase the number of school districts (to include rural and out-of-area school districts) that are hosting yearlong internship candidates.

Rationale: By promoting the continuous development of collaboration between school districts across the state through the increase of students who are in yearlong internship and school districts that are willing to host students, the middle level program will continue to help the college of education in the accreditation process by providing evidence for CAEP Standard 2.
