

Integrated Unit Due Dates

The Unit Plan will be submitted to TiRs. TiRs will communicate the final due date for the Integrated Unit Plan. By this date, interns must submit the Unit Plan to their TiR and release it for evaluation to their TiR in TaskStream.

Throughout the process of creating the Integrated Unit, TiRs will check on interns' progress. Checkpoints are established to help interns pace their work and serve as opportunities for TiRs to formatively assess the interns' work and provide feedback. Checkpoints are not optional. At each checkpoint, all interns should submit the assigned sections as well as revisions to previous sections according to the instructions of their TiR.

Checkpoints will be determined by each TiR and communicated to the interns. Interns should be aware their check points will vary from interns at other schools. It is important to follow the instructions of **your** TiR to ensure the correct work is submitted at the right time. **Five points will be deducted for each checkpoint submitted after the date set by the TiR.**
